SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Enclosed is Form PTO-1449, Information Disclosure Citation  
In An Application.

The following Patents and/or Publications are submitted to  
comply with the duty of disclosure under CFR 1.97-1.99 and  
37 CFR 1.56.

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being  
deposited with the United States Postal Service as first class  
mail in an envelope addressed to: Commissioner for Patents,  
P.O. Box 1450, Alexandria, VA 22313-1450, on June 28, 2005.

Stephen B. Ackerman, Reg.# 37761

The Commissioner is hereby authorized to charge the IDS Processing Fee of \$180, under 37 CFR 1.17(p), to Deposit Account No. 19-0033. A duplicate copy of this sheet is enclosed.

U.S. Patent US 2002/0158334 A1 to Vu et al., "Microelectronic Device Having Signal Distribution Functionality of an Interfacial Layer Thereof," discusses a microelectronic device including a microelectronic die having an interfacial metal layer deposited over an active surface thereof to perform a signal distribution function within the device.

U.S. Patent 6,187,680 to Costrini et al., "Method/Structure for Creating Aluminum Wirebound Pad on Copper BEOL," discloses a method for fabricating an integrated circuit (IC) structure having an Al contact in electrical communication with Cu wiring embedded in the initial semiconductor wafer.

U.S. Patent 6,232,147 to Matsuki et al., "Method for Manufacturing Semiconductor Device with Pad Structure," discloses a semiconductor device equipped with secondary pads having adequate arrangement for an arbitrary packaging process.

U.S. Patent 6,229,221 to Kloen et al., "Integrated Circuit Deivce," discloses an integrated circuit device which comprises an active circuit provided in an active circuit area at a surface of a semiconductor body, a plurality of bond pads disposed substantially over th eactive circuit area and electrical connections between the bond pads and the active circuit.

U.S. Patent 6,472,745 to Iizuka, "Semiconductor Device," discloses a semiconductor device in which a plurality of semiconductor chips are consolidated into one and which is provided with at least a set of rerouting wiring lines formed so as to interconnect electrodes of the respective semiconductor chips.

U.S. Patent 6,200,888 to Ito et al., "Method of Producing Semiconductor Device Comprising Insulation Layer Having Improved Resistance and Semiconductor Device Produced Thereby," discloses a semiconductor device comprising an insulation film covering a semiconductor chip so as to expose electrodes or pads fabricated in the chip and wiring lines located on the insulation film and connected to the respective electrodes of pads.

Sincerely,

  
Stephen B. Ackerman,  
Reg. No. 37761
